Special offers version 4

Beside my regular guitar models, these past years I have been building a number of additional instruments for exhibition purposes and some just for the fun of building. All instruments are in perfect shape and sound beautiful.

Unfortunately I can not keep them all for ever, so they are for sale. For those of you that are looking for a top-class handmade instrument for a reduced and modest price, this might be an opportunity.

For details on the instruments, please look at the pages below and if interested, just contact me.

Page
